**The UK's trusted landscape and  
grounds maintenance supplier**

Grass Seed / Wildflower Seed / Fertilisers / Weed Control / Spraying  
Bark / Compost / Groundcover / Windbreaks / Anti Bird Netting  
Ground Reinforcement / Irrigation / Tools / Safety Wear

## Our commitment to sustainable solutions

Green-tech's efforts to provide more sustainable solutions for our customer base are continually evolving, working with suppliers and gaining feedback from customers to develop product solutions. Over the last five years, sourcing products with environmental credentials has been the paramount focus for Green-tech, ensuring we offer our customers the most up-to-date developments in the market place.

Green-tech has witnessed the growth of our customers and the forestry and landscape markets as a whole. We are proud to be an integral part of the supply chain for these industries. Helping forestry, landscape and grounds management professionals make environmental and sustainable decisions for their projects.

## Supporting St Leonard's Hospice

Each year, a member of the Green-tech team selects a charity for the company to support throughout the year. For 2025, Deputy Team Leader, Chris Cross' chosen charity is St Leonard's Hospice, a much-loved and vital organisation that provides exceptional care and support for people with life-limiting illnesses in York and North Yorkshire.

St Leonard's Hospice offers a range of services, including inpatient care, a Hospice@Home service, and bereavement support for families. Their compassionate approach ensures that

patients and their loved ones receive the care and dignity they deserve during challenging times. As an independent charity, St Leonard's relies heavily on donations to continue its critical work.

The Green-tech team aims to raise over £1000 during 2025 through various fundraising events and initiatives.

## New Product Development

Green-tech has collaborated with manufacturers and suppliers from across the landscape industry to introduce environmentally conscious products to the market. Our approach to product selection is guided by the goal of minimising environmental impact while promoting healthy ecosystems. We prioritise organic fertilisers, eco-friendly pest control methods and soil amendments that are free from chemicals.

In addition, we focus on incorporating biodegradable, recycled and recyclable materials into landscaping and ground maintenance applications. This commitment helps reduce the environmental footprint of landscaping projects and promotes the reuse of materials.

A key element of our strategy is the avoidance of single-use plastics, which significantly contributes to reducing waste and encourages more sustainable practices within the industry. By aligning our product choices with sustainability goals, Green-tech is dedicated to providing solutions that meet the needs of today's landscapes, whilst protecting and preserving the natural world for the future. Through these careful considerations, we strive to be a leader in promoting eco-friendly landscaping products and solutions that enhance the health of the environment.

## MycoForce Mycorrhizal Grass Seed Coat

A cutting-edge solution utilised by championship golf course, stadia and playing fields to achieve rapid grass establishment, while reducing water and fertiliser requirements.

**Sowing rate:** 25g/m<sup>2</sup>

**Pack sizes available:** 400g

## Super Root Tetraploid Grass Seed

An extremely hard-wearing, fast establishing mix with great recovery, year-round colour and suitable for stressed turf surfaces with germination from just 4°C.

**Mix includes:** Perennial Ryegrass, Strong Creeping Red Fescue

**Sowing rate:** 30 – 40g/m<sup>2</sup>

**Pack sizes available:** 20kg

## Economy Landscape

Ideal for general purpose and amenity landscaping.

**Mix includes:** Perennial Rye Grass, Strong Creeping Red Fescue

**Sowing rate:** 25 – 35g/m<sup>2</sup>

**Pack sizes available:** 5kg, 10kg, 20kg

## Utility

Ideal for general landscaping areas, lawns and parks.

**Mix includes:** Amenity PRG, Slender Creeping Red Fescue, Strong Creeping Red Fescue, Browntop Bent

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Low Maintenance

Ideal for country parks and nature reserves.

**Mix includes:** Creeping Red Fescue, Chewings Fescue, Hard Fescue, Bent

**Sowing rate:** 25 – 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Prize Lawn

Ideal for back lawns, utility areas, housing estates and cricket outfields.

**Mix includes:** Amenity PRG, Chewings Fescue, Slender Red Fescue, Dwarf Turf Perennial, Browntop Bent

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Greensward

Ideal for banks, building surrounds and landscape areas.

**Mix includes:** Chewings Fescue, Strong Creeping Red Fescue, Browntop Bent

**Sowing rate:** 35 – 50g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Formal

Ideal for lawns, quality landscape areas and fairways.

**Mix includes:** Chewings Fescue, Slender Red Fescue, Browntop Bent, Strong Creeping Red Fescue

**Sowing rate:** 35 – 50g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Parks

Ideal for recreation grounds, lawns and all heavy duty sport pitches.

**Mix includes:** Amenity PRG, Amenity PRG, Strong Creeping Red Fescue, Smooth Stalked Meadow Grass

**Sowing rate:** 35 – 50g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Estates

Ideal for temporary reseeding, utility areas and sportsgrounds.

**Mix includes:** Amenity PRG, Creeping Red Fescue, Amenity PRG

**Sowing rate:** 25 – 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## DOT

Ideal for road verges and embankments.

**Mix includes:** Amenity PRG, Strong Creeping Red Fescue, Hard Fescue, Strong Creeping Red Fescue, Browntop Bent, White Clover

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Suburban

Ideal for back lawns, utility areas, housing estates and cricket outfields.

**Mix includes:** Amenity PRG, Amenity PRG, Chewings Fescue, Strong Creeping Red Fescue

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Landscaping with Rye Grass

Ideal for general purpose/amenity.

**Mix includes:** Dwarf Turf Perennial Ryegrass, Dwarf Turf Perennial Ryegrass, Strong Creeping Red Fescue

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Landscaping without Rye Grass

High quality landscape grass seed, ideal for general purpose/amenity.

**Mix includes:** Strong Creeping Red Fescue, Chewings Fescue, Slender Creeping Fescue

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

# Grass Seed: Sports Fields

Hard-wearing

Drought Tolerant

Shade Tolerant

Low Maintenance

Fine Appearance

## Action Replay

A very hard-wearing grass seed, particularly designed for all heavy-duty sports pitches. This grass seed germinates and establishes quickly for a dense, hard-wearing sward.

**Mix includes:** 4 Way Turf PRG

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Wicket Renovation

A rapid-germinating, heavy-duty, all ryegrass mixture ideal for overseeding cricket squares and wicket ends with quick recovery properties.

**Mix includes:** 50% Dwarf Turf PRG, 50% Dwarf Turf PRG

**Sowing rate:** 35 – 50g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Greens

Ideal for use on golf greens, putting greens and ornamental turf.

**Mix includes:** Chewings Fescue, Chewings Fescue, Browntop Bent

**Sowing rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Green Baize

Ideal for bowling greens, croquet lawns and golf greens.

**Mix includes:** Chewings Fescue, Slender Creeping Red Fescue, Browntop Bent

**Sowing rate:** 25 – 50g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Tee Turfmaster

Ideal for golf tees which recovers well from club head damage.

**Mix includes:** Amenity PRG, Slender Red Fescue, Smooth Stalked Meadow Grass, Chewings Fescue, Browntop Bent, Strong Creeping Red Fescue

**Sowing rate:** 25 – 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

## Grass Seed: Paddock and Hay

### Supreme Long Term Pasture

A long-term agricultural mix for grazing in fields.

**Mix includes:** Perennial Ryegrass – Mid, Perennial Ryegrass – Late, White Clover

**Sowing rate:** 25 – 30g/m<sup>2</sup>

**Pack sizes available:** 14kg

### Heavy Crop Medium Term Pasture

A medium-term agricultural mix for grazing in fields.

**Mix includes:** Perennial Ryegrass – Early, Perennial Ryegrass – Mid

**Sowing rate:** 25 – 30g/m<sup>2</sup>

**Pack sizes available:** 14kg

### Equi-Graze Pasture

A pasture mix for grazing in paddocks.

**Mix includes:** Perennial Ryegrass – Early, Perennial Ryegrass – Mid, Perennial Ryegrass – Late, Timothy, Smooth Stalked Meadow Grass, Strong Creeping Red Fescue

**Sowing rate:** 25 – 30g/m<sup>2</sup>

**Pack sizes available:** 14kg

## Custom Grass Seed Mixes

**Select the perfect grass seed mix for your soil type or area of application**

Green-tech works in partnership with established seed houses to develop bespoke and specialist grass seed mixes for your project.

The Green-tech team is on hand to help with your seed selection, email [sales@green-tech.uk](mailto:sales@green-tech.uk)

John  
Chambers®  
WILDFLOWER SEED

## Wildflower Matting

A pre-grown substrate of established flowering plants and grasses, designed to create an instant wildflower meadow.

- Supplied in a dense sward which acts as a weed barrier
- Prolonged flowering period for year-round aesthetic
- Particularly suited to well-drained and impoverished soil that receives plenty of sunshine
- Wide variety of applications

# John Chambers Professional Wildflower Seed Range

The Professional range is ideal to be specified on large-scale landscaping projects and contains blends of much-loved native wildflower species. The Professional mixes contain mainly perennial species and will regenerate strongly every year, after an initial period of maintenance and establishment.

## Professional Clay Soils Mix

Best suited to heavy clay soils with high water retention, which are prone to dry out in high summer heat.

**Species include:** Betony, Meadow Vetchling, Salad Burnet, Yellow Rattle, Common Sorrel, Meadow Buttercup

**No. of species:** 20

**Type:** 100% Seed, 80% Grass Seed

## Professional Calcareous Soils Mix

A mixture of flowering species which favour low fertility lime-rich soils (above pH7).

**Species include:** Selfheal, Dropwort, Common Vetch, Wild Carrot, Bird's-foot-trefoil, Common Poppy

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Cornfield Annuals Mix

A variety of annual species, quick to establish, for a bright colourful display.

**Species include:** Field Forget-me-not, Field Poppy, Cornflower, Field Pansy, Corn Marigold, Corn Chamomile

**No. of species:** 10

**Type:** 100% Seed

## Professional Acid Soils Mix

Species which will survive and thrive in areas with moderately acidic conditions (approximately pH 4 – 5.5pH).

**Species include:** White Clover, White Campion, Oxeye Daisy, Common Knapweed, Lady's Bedstraw, Ragged Robin

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Hedgerows Mix

Suitable for sowing alongside hedgerows, woodland edges and areas of partial shade.

**Species include:** Bluebell, Foxglove, Wild Angelica, Yarrow, White Campion, Oxeye Daisy

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Woodland/ Shaded Area Mix

Ideal for use in heavily shaded areas with damp soils.

**Species include:** Wood Sage, Wood Aven, Common Knapweed, Ragged Robin, Red Campion, St John's-wort

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Coastal Mix

Designed to suit species suitable for harsh coastal environments, tolerant of saltier conditions.

**Species include:** Sea Campion, Viper's Bugloss, Bladder Campion, Greater Knapweed, Cat's Ear, Field Poppy

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Loam Soils Mix

Ideally suited for loam and alluvial medium textured soils with a neutral to alkaline pH.

**Species include:** Betony, Meadow Vetchling, Salad Burnet, Yellow Rattle, Common Sorrel, Meadow Buttercup

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Sandy Soils Mix

An optimal mixture for sandy, low fertile free-draining soils which can be prone to drought.

**Species include:** Agrimony, Dark Mullein, Meadow Crane's-bill, Kidney Vetch, Wild Carrot, Yellow Rattle

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

## Professional Wet and Moist Soils Mix

A variety of species suited to damp and high water retention areas (particularly in winter) with seasonal drainage.

**Species include:** Gypsywort, Meadowsweet, Water Aven, Sneezewort, Purple Loosestrife, Meadow Buttercup

**No. of species:** 15

**Type:** 100% Seed, 80% Grass Seed

# John Chambers Pro Basic Wildflower Seed Range

The JC Pro Basic mixes have been created to suit a wide variety of soil types and environmental conditions, for situations where site information may be lacking. The mixes contain mainly perennial wildflower species and can be supplied with differing diversity of species.

Shaded Areas

Sunny Spots

Free-draining

## Pro Basic 8 Mix

An economical general purpose mixture to suit smaller budgets without compromising on species impact.

**Species include:** Lady's Bedstraw, Oxeye Daisy, Meadow Buttercup, Burnet Salad, Yarrow, Red Campion

**No. of species:** 8

**Type:** 100% Seed, 80% Grass Seed

## Pro Basic 16 Mix

An economical species diverse mix.

**Species include:** Yellow Rattle, Birds-foot-trefoil, Wild Carrot, Selfheal, Common Knapweed, Oxeye Daisy

**No. of species:** 16

**Type:** 100% Seed, 80% Grass Seed

## Pro Basic 20 Mix

A diverse mixture of species for a splash of colour on general purpose sites.

**Species include:** Red Campion, Kidney Vetch, Common Vetch, Greater Knapweed, Lady's Bedstraw, Yarrow

**No. of species:** 20

**Type:** 100% Seed, 80% Grass Seed

## Pro Basic 25 Mix

A premium general purpose mixture with a variety of wildflower species.

**Species include:** Musk Mallow, Common Sorrel, White Clover, Ribwort Plantain, Common Dandelion, Red Clover

**No. of species:** 25

**Type:** 100% Seed, 80% Grass Seed

## Pro Basic 12 Mix

A great value all purpose mixture to suit a variety of soil types.

**Species include:** Wild Carrot, Selfheal, White Clover, Whiter Campion, Meadow Buttercup, Common Sorrel

**No. of species:** 12

**Type:** 100% Seed, 80% Grass Seed

## Pro Basic Dual Purpose

A mixture of general purpose perennial species, enhanced with annuals for first year colour.

**Species include:** Field Pansy, Corn Marigold, Corn Chamomile, Common Vetch, Selfheal, White Campion

**No. of species:** 25

**Type:** 100% Seed, 50/50 Mix, 80% Grass Seed,

# John Chambers Wildflower Plug Plants

Through our expert growing partners, we supply wildflower plug plants as individual species in any quantities required (minimum ten per species), or we have specially selected mixed packs available, which contain a selection of species, suitable for many different scenarios. Each pack contains at least 10 species, and these vary, based upon whichever species are looking best at the time of supply, so you can be sure that you are getting the healthiest-possible small plants.

Our plug plants have had a great start to life and are grown in separate cells with healthy root systems. Because the plugs are small, it is important to ensure they are planted as soon as possible after delivery, and given irrigation to help them establish quickly, in the ground.

## Benefits

- Easy to grow
- Provide nature with a boost
- Great at increasing biodiversity in grasslands, woodlands and public spaces such as gardens and road verges
- Can be planted individually to create areas of solid colour or within wildflower matting, to enhance species biodiversity

## Pack quantities

50, 150, 500

Stock is subject to availability and is seasonal, although some species are available throughout the year.

## Packs available

- JC Clay Soils
- JC Calcareous
- JC Acid Soils
- JC Wet & Moist Soils
- JC Pond Edge
- JC Hedgerow
- JC Woodland & Shade
- JC Green Roof/Coastal
- JC Flowering Lawn/Short
- JC Tall
- JC Colourful
- JC Scented
- JC Wildflowers for Bees
- JC Wildflowers for Butterflies
- JC Wildflowers for Moths
- JC Wildflowers for Birds
- JC Spring Flowering
- JC Summer Flowering
- JC Long Flowering Season

## Case Study:

### Green-tech helps EMR Metal Recycling increasing biodiversity

European Metal Recycling (EMR) is a global leader in metal recycling. They operate metal recycling sites across 60 locations throughout the UK and want to increase biodiversity throughout these sites.

Working with Glendale, a grounds maintenance contractor providing landscape and green space management for private and public sectors, EMR launched its rewilding initiative at its state-of-the-art site in Oldbury. They intend to tackle the impact of climate change and give local nature a much stronger chance of surviving and thriving for future generations.

The EMR environmental project, which covers 3 hectares of land, will create a biodiversity increase at the Oldbury site of 95%, ensuring greater protection of the environment, and preservation and enhancement of key habitats.

The initiative included the sowing of approximately 1000m<sup>2</sup> of John Chambers Dual Purpose and John Chambers Impact Violet Heart Mix 100%. The 5kg of seed that was sown comprised a mix of native and nectar-rich annuals and perennials. The area of previously rough ground was seeded in May 2023 using a mix devised by EMR Environmental Specialist Aaron Roberts. The Cornfield Annual species came through quickly to give an initial burst of colour, while the slower-growing perennials established, ready to spring forth from Spring 2024 (Year 2) onwards.

A brand of Green-tech, John Chambers Wildflower Seed is one of the leading authorities on native wildflower seed, distributing a comprehensive range of products that protect, enhance, and improve the landscape environment.

In addition, a variety of 100 native saplings and trees and species-rich hedgerows were planted to improve the overall habitat and absorb 35 tonnes of carbon per annum into the new biomass growing on site. A mixture of grass seeds and different varieties of flowers will be grown, as well as ongoing management of the woodland area to allow other species to flourish.

Aaron Roberts of EMR Group said, "It has been a pleasure working on this project creating positive environmental change at our EMR Group Oldbury site. With the new plants and habitat creation at Oldbury, we have increased biodiversity by over 95% and we are helping sequest 35 tonnes of CO<sub>2</sub>. Hopefully, our project inspires other companies to create positive environmental change at their sites and increase their biodiversity."

# Summer Tree Maintenance

## Tree Irrigator Bag

A UV stabilised, slow-release watering bag for trees with a diameter of 3cm to 20cm. It delivers water to the root system with no run-off or evaporation.

Made of green polyethylene with scrim reinforcement, black polypro straps and nylon zippers which simply zip around the tree trunk; allowing you to fill up the bag with water. For trees with a wide girth diameter (10cm plus) use a double bag set up – two bags zipped together.

Each bag holds approximately 60 litres of water which is gradually released over 5 to 9 hours.

## Machine Round Stakes

Manufactured with a pointed end and a chamfered top. They have been treated with Green Osmose AE500 to guarantee longevity.

### Products available

Machine Round Stakes (Ø 50mm, Pack Size 431): 1.2m, 1.5m, 1.65m, 1.8m,

Machine Round Stakes (Ø 60mm, Pack Size 298): 1.2m, 1.8m, 2.4m

Machine Round Stakes (Ø 75mm, Pack Size 203): 1.5m, 1.65m, 1.8m, 2.1m, 2.4m

## Premium Strimmer Guards

A tough, thick plastic guard to protect established trees from strimmer, machinery and animal damage. Allows you to clip multiple sections together to create desired tree trunk dimension.

### Products available

Strimmer Guard: 335mm x 200mm x 95mm

## Weld Mesh

A solution for tree planting or to protect established trees against livestock, sheep or deer that can cause lasting damage to trees.

Supplied in one piece and semi-rolled, manufactured from 12-gauge galvanised wire, feature a split down their length for placement to then secure with cable ties.

### Products available

Weld Mesh (Galvanised): 1.2m x 250mm  
1.2m x 300mm, 1.8m x 250mm,  
1.8m x 300mm

## Chainlock Tie

A quick and easy tree tie system to secure trees and shrubs during tree planting and landscaping. Chainlock Tie can be secured to a tree stake post or cross bar and tightened or loosened by threading the belting through itself.

### Products available

Chainlock Tie (25m Roll): No.2: 11.4 x 2.5mm,  
No.3: 11.4 x 3.8mm, No.4: 25.4 x 3.8mm,  
No.5: 25.4 x 3.8mm

## Super Softee Tree Ties

An environmentally-friendly, easy to use rubber strap to secure trees to stakes. High performance, strong and extremely stretchy, which benefits young trees. Requires less maintenance with inspections only required every three years.

### Products available

Super Softee Tree Ties (Pack Size: 100):  
30cm x 12.5mm, 40cm x 22mm,  
50cm x 22mm, 60cm x 22mm

## Buckle & Semi Mature Tree Ties

Semi Mature Tree Ties are strong and made from unbreakable polycarbonate to prevent trees rubbing against stakes. They are stretchy, come with a collar and offer a long-life performance.

### Products available

Buckle & Semi Mature Tree Ties  
(Pack Size: 100): 30cm x 12.5mm,  
38cm x 25mm, 45cm x 25mm, 60cm x 25mm

Buckle & Semi Mature Tree Ties  
(Pack Size: 50): 60cm x 38mm

## Easi-Fix Tree Strapping

Great for securing trees to stake posts or cross bars. Nail on belting with rubber tree blocks or tree cushions to secure young trees and reduce abrasion. Allows trees to grow around the cushions and reduces wind damage.

### Products available

Easi-Fix Tree Strapping (Roll):  
25m x 25mm, 25m x 38mm

## Rubber Tree Cushions

A strong yet pliable thermoplastic rubber with ribbed surface for grip which creates a cushion when planting and securing young trees to stakes. They have a hollow centre and can change shape which enables the tree to grow.

### Products available

Rubber Tree Cushion (Pack Size 100):  
50mm x 50mm x 15mm (25mm Opening)  
50mm x 50mm x 15mm (38mm Opening)

## Cable Ties & Fixings

### Cable Ties

Releasable Cable Ties (Pack Size: 1000):  
4.8cm x 200mm, 4.8cm x 300mm

Non-releasable Cable Ties (Pack Size: 1000):  
4.8cm x 200mm, 4.8cm x 300mm

### U Fencing Staples

Galvanised: 20mm/2mm gauge,  
40mm/4mm gauge (Pack: 20kg)

### 5mm Yellow Woodscrews

40mm, 50mm, 60mm, 70mm, 80mm (200/Box)  
90mm, 100mm (100/Box)

### 4mm Yellow Woodscrews

30mm, 40mm, 50mm, (200/Box)

### Presser Point Staples

Galvanised: 2mm x 20mm (1kg Bag/approx. 135)  
3.35mm x 30mm (2.5kg Tub/approx. 568)  
4mm x 40mm (2.5kg Tub/approx. 338,  
1kg Tub/ approx. 135)

### Clout Nails

75mm x 3.35mm (Pack: 20kg)

### Clout Nails

Galvanised: 25mm x 2.65mm (1kg Tub  
approx. 815, 2.5kg Tub/approx. 2038)  
40mm x 2.65mm (1kg Tub/approx. 570,  
2.5kg Tub/approx. 1425)

### Hog Rings

Pack Size: 500

## Fertilisers: Planting

### TerraCottem arbor

TerraCottem arbor increases tree survival rates and reduces replacement cost. This specialist mix enhances water retention, soil structure and microbiological activity while a mix of tree specific fertilisers aid rapid plant establishment for the vital first 12 months after planting.

**Application rate:** 1.5kg/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

### Terracottem universal

For optimal growth of all your plants with less water.

TerraCottem universal is the original TerraCottem soil conditioner and can be used for all types of planting projects such as trees, shrubs, revegetation, annuals, perennials, roof gardens, agriculture, horticulture and potting soils.

**Application rate:** 1.5kg/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

### TerraCottem complement

Replenishes the components that have been consumed by the plants during the previous growing season and those lost each time a crop or annuals are pulled from the soil. Due to its application the nutrient and water holding capacity of soils and growing media is kept in optimal conditions.

**Application rate:** 1.5kg/m<sup>2</sup>

**Pack sizes available:** 20kg

## Woodland Grow Natural Fertiliser

Comprises British native woodland fungal communities and soil microbes that will enhance the biology of poor quality or intensively managed soils.

- **Restoration Grade:** Supports the restoration of highly degraded soils.
- **New Plantation Grade:** Prepares the soil ahead of new tree planting applications.
- **Restocking Grade:** Provides a biome boost for existing tree plantings.

**Application rate:** 1,000 whips/trees/20kg

**Pack sizes available:** 20kg

## N-Mag Lite

Ideal for use as a base dressing when planting or containerising trees and shrubs. It may also be used as a top dressing for hardy nursery stock. Provides nutrients in slow-release form to keep the nutrients working together for longer.

**Application rate:** 70 – 140g/m<sup>2</sup>

**Pack sizes available:** 20kg

## Blood Fish + Bone Powder

A balanced organic fertiliser in powder form. The nitrogen in fish, blood and bone encourages strong growth and healthy rich green foliage, whilst the slow release of phosphate promotes vigorous root growth.

**Application rate:** 35 – 70g/m<sup>2</sup>

**Pack sizes available:** 25kg

## CRF Sierrablen Flora 11-22-9

Tree and shrub fertiliser based on the osmocote technology offering a 8 – 9 month longevity. Versatile in use, this fertiliser can be applied to a wide range of trees and shrubs. Resists leaching, even in pure sand.

**Application rate:** 25 – 120g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Bonemeal

An organic fertiliser for plant nutrition without causing rapid growth. Suitable for shrubs, roses and general garden plants during planting and seeding for good root development.

**Application rate:** 140g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Osmocote Exact PrePlant

A slow-release fertiliser for potted and container plants and flower beds. This controlled fertiliser can have lasting effects for up to 6 months after one application, with the included magnesium and trace elements allowing for healthy maintained growth.

**Application rate:** Variable on planting area and/or pot volume

**Pack sizes available:** 1kg

## Growmore 7-7-7

A well-known balance NPK suitable as a short general feed. Offering multi-purpose properties ideal for use in the garden and on established plants as a balanced feed. Work directly into pre-watered soil and water after planting.

**Application rate:** 30 – 40g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Rose Feed 5-5-10

A quality granular feed for roses. Suitable for all rose types, it contains all the essential nutrients and trace elements specifically formulated to deliver the nutrients which rose plants require in order to grow well and stay healthy.

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Landscaper Pro® Flora Tablets 15-9-9 + 3Mg O

A controlled release fertiliser in tablet form offering a two year feed. Designed for use around pot and field grown trees, shrubs, newly planted stock and other soil grown crops. The nutrients are slowly released over time so they are not lost.

**Application rate:** N/A

**Pack sizes available:** 15g/tab (466/bucket)

## Fertilisers: Lawn and Turf Care

### Complete Feed, Weed and Moss Killer

Ideal for the control of broadleaved weed species and moss on lawns.

**Application window:** May – August

**Application rate:** 32g/m<sup>2</sup>

**Pack sizes available:** 10kg, 20kg

### Sportsmaster® Spring Summer 9-7-7

Medium nitrogen fertiliser in mini-granule form. For use as a general fertiliser and a pre-seeder.

**Application window:** April – September

**Application rate:** 35 – 70g/m<sup>2</sup> or 15 – 20g/m<sup>2</sup> for pre-seeding

**Pack sizes available:** 25kg

### Spring Summer 9-7-7 Energise Maxi

Ideal for treating any grass area such as fine garden lawns to sports fields.

**Application window:** April – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 10kg, 25kg

### Autumn Winter 3-12-12 Recharge Maxi

Ideal for using in the colder months to strengthen turf or to condition in advance of possible stress.

**Application window:** October – March

**Application rate:** 25g/m<sup>2</sup>

**Pack sizes available:** 10kg, 25kg

### Landscaper Pro® Triple Action 14-0-5

An all in one granular feed, weed and mosskiller. This product maintains growth, contains a selective herbicide for weed control plus iron for moss control.

**Application window:** March – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 15kg

## Spring Summer Mini Granular 12-0-9

A mini granular form fertiliser most suitable for the warm summer months to green up lawns and promote root development and healthy growth.

**Application window:** February – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Spring Summer 20-10-10

A quality NPK fertiliser with a balanced high nitrogen content. For use on outfields and amenity areas for general maintenance and feed.

**Application window:** April – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Sportsmaster® Autumn Winter 4-12-12

High potash and phosphate are ideal for root development and feeding during the dormant period and will greatly assist the sward to withstand hard winter use. Mini-granular formulation.

**Application window:** August – November

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Sportsmaster® Cleanrun Pro Feed and Weed 14-0-5

Mini-granular with powerful herbicides for control of common broad leaved weeds, including daisy and white clover. Contains mecoprop-p and MCPA.

**Application window:** March – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Sportsmaster® Renovator Pro Feed, Weed and Mosskiller

Mini-granular with selective herbicides plus iron for the control of moss and a rapid green-up. Contains mecoprop-p, MCPA and iron sulphate.

**Application window:** April – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Landscaper Pro® Spring and Summer 20-0-7

A high impact fertiliser with controlled release technology suited for spring and summer application. Formulated to give a strong immediate response.

**Application window:** March – September

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 5kg, 15kg

## Landscaper Pro® Autumn and Winter 12-5-20

Suited for autumn and winter application. Results in slow, steady growth that helps prevent stress in cold weather and will assist your turf towards a healthy start in spring.

**Application window:** August – October

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 15kg

## Landscaper Pro® Universtar Balance 15-5-15

A general purpose controlled release fertiliser. 2 – 3 month release.

**Application window:** March – August

**Application rate:** 35g/m<sup>2</sup>

**Pack sizes available:** 25kg

## Fertilisers: Lawn and Turf Care

### Pre-seeder Fertiliser

A high P analysis to enhance seed establishment and Zn to improve root development.

**Application rate:** 25g/m<sup>2</sup>

**Frequency:** Apply up to 14 days before seeding or turfing up to 6 weeks after.

**Pack sizes available:** 20kg

### Spring-Gem 14-3-10

A foliar NPK fertiliser tailored for grassed areas. Offers expedited absorption directly through leaf tissue to manifest more rapidly.

**Application rate:** Variable based on application method

**Pack sizes available:** 10L

### Autumn-Gem 4-2-16

A foliar NPK fertiliser designed for lush greenery such as fine turf, lawns, sports fields and amenity areas. With a water-soluble formula to be sprayed for rapid absorption in Autumn.

**Application rate:** Variable based on application method

**Pack sizes available:** 10L

### MycoGro Organic Starter Fertiliser

Designed to kickstart healthy growth in your plants, newly sown lawns, trees, shrubs, vegetables or flowers. Provides a balanced blend of essential nutrients for optimal plant development.

**Application rates:**

Trees, shrubs and plants: 100g/m<sup>2</sup>  
Lawns: 50 – 75g/m<sup>2</sup>

**Frequency:** Every 6 – 8 weeks

**Pack sizes available:** 10kg, 20kg

### MycoGro Spring and Autumn Fertiliser

Formulated to support the health and vitality of your lawn during the summer months. Provides a balanced blend of nutrients essential for robust grass growth and resilience.

**Application rate:** 25 – 50g/m<sup>2</sup>

**Frequency:** Every 6 – 8 weeks

**Pack sizes available:** 10kg, 20kg

### MycoGro Summer Fertiliser

Designed to nurture your lawn during the transitional seasons, ensuring lush, vibrant grass year-round. Promotes healthy growth and resilience in your lawn.

**Application rate:** 25 – 50g/m<sup>2</sup>

**Frequency:** Every 6 – 8 weeks

**Pack sizes available:** 10kg, 20kg

## Lawn Top Dressing, Conditioners and Loams

### Kaloam

A highly durable cricket top dressing producing quality pitches with excellent bounce, carry and recovery. Easy to prepare with fast grass seed germination.

**Application rate:** Variable based on application area

**Pack sizes available:** 25kg

### Lawn Top Dressing

High quality top dressing for dressing any fine turf. Produces fine, free draining surfaces with an open soil structure.

**Application rate:**

Light dressing: 2kg/m<sup>2</sup>

Medium dressing: 4kg/m<sup>2</sup>

Heavy dressing: 6kg/m<sup>2</sup>

**Pack sizes available:** 25kg

### Club Loam Top Dressing

Produces quality, hard, consistent pitches with good bounce and carry. Club loam is free draining and guarantees easy spreading.

**Application rate:** Variable based on application area

**Pack sizes available:** 25kg

### Sulphate of Iron 20% Fe

Used to green and toughen up grass while suppressing moss growth in lawns and turf. Strengthens the plant against frost and disease in large areas such as horse paddocks and amenity areas.

**Application rate:** Variable based on application area

**Pack sizes available:** 25kg

### Lawn Sand 8-0-0-7% Fe

Controls moss in turfed areas and treats lichen and algae. Perfect for improving surface drainage and strengthening turf.

**Application rate:** 35 – 140g/m<sup>2</sup>

**Pack sizes available:** 25kg

# Push Spreaders

## Handy Professional Push Fertiliser Spreader

An all-round broadcast spreader with a polypropylene hopper that sits on a powder coated frame with pneumatic tyres and enclosing gearing. Features a folding handle and multiple feed settings.

**Capacity:** 22kg

**Maximum spread:** 3m

## Cresco 8 Economy Spreader

A good quality, budget-friendly spreader for fertiliser and salt spreading. Can be adapted for the season with the summer or winter slider. Featuring a retractable back stand and folding handlebar for easy storage.

**Capacity:** 30kg

**Maximum spread:** 3.5m

## Cresco 10SW Homeowner Broadcast Spreader

Suitable for spreading fertiliser and rock salt. Features a simple slide system technology for changes in weather and environment. Strong steel frame and tough poly hopper with a cushioned handle and enclosed gearing. Features 20 fertiliser settings.

**Capacity:** 30kg

**Maximum spread:** 6m

## Cresco 20SW High Output Salt Spreader

A high output spreader designed to cope with the demands of all seasons. Adapts to weather and environmental changes with its simple slide technology. The large agitator improves stirring and flow, while the hopper mould ensures all product is used without blockages.

**Capacity:** 30kg

**Maximum spread:** 6m

## Cresco 30SWP Professional Spreader

A painted frame spreader for large scale fertiliser and salt applications for all seasons. Featuring a multifunctional interchangeable shutter plate, mesh grill and pneumatic wheels with a metal hub.

**Capacity:** 53kg

**Maximum spread:** 6m

## Cresco 30SWS Professional Spreader

A stainless steel frame spreader for large spreading projects for both fertiliser and salt. Features a multifunctional interchangeable shutter plate, mesh grill and pneumatic wheels with a metal hub.

**Capacity:** 53kg

**Maximum spread:** 6m

# Towable Spreaders

## Handy Towable Fertiliser Spreader

Ideal for users wanting to apply fertiliser, seed, salt and other granular materials. Features a tough polypropylene hopper, steel drawbar with hitch pin connection and 12" pneumatic tyres. Adjustable flow rate..

**Capacity:** 36.5kg

**Maximum spread:** 3m

# Carried Spreaders

## Appli-tec Dual Spreader

An easy-to-use solution for spreading fertiliser, lawn feed and seed evenly across gardens. This rotary spreader ensures consistent coverage, helping achieve lush, healthy grass without hassle. It is lightweight, durable, weather resistant, reliable and suitable for small or larger projects.

**Capacity:** 25kg

**Maximum spread:** 4m

## Appli-tec 2000 Spreader

A high-quality rotary spreader designed for easy and precise application of fertiliser and lawn feed. This professional grade spreader is suitable for maintaining small home lawns and large green spaces – it ensures coverage for stronger, greener grass. User-friendly, built to last with excellent resistance to rust and weather damage.

**Capacity:** 25kg

**Maximum spread:** 6m

## Cresco 5 Shoulder Bag Spreader

A shoulder bag spreader ideal for grass seed, fertiliser and salt spreading. Featuring a significantly enhanced gearbox, improve tensile strength and superior reliability and strength.

**Capacity:** 9kg

**Maximum spread:** 6m

## Cresco 1 Handheld Spreader Hopper

A handheld spreader ideal for fertiliser and salt spreading. Featuring an ergonomic handle and built-in armrest, as well as a hopper designed for scooping directly out of the product bag.

**Capacity:** 2kg

**Maximum spread:** 6m

## Handheld Spreader

A handheld spreader adapted for both fertiliser and salt. Featuring five spread rate settings, an ergonomic handle and built-in armrest with a hopper that scoops directly from the product bag.

**Capacity:** 2kg

**Maximum spread:** 4m

# Total Weed Control

## Gallup Biograde 360

A professional grade, systemic total herbicide containing glyphosate. Controls a broad spectrum of annual and perennial grasses and broad-leaved weeds, including invasive and difficult species such as Japanese Knotweed and Giant Hogweed.

**Activity:** Non-selective

**Active ingredient:** Glyphosate

**MAPP number:** 17612

**Coverage/dose:** 1 hectare/5L

**Pack sizes available:** 5L, 20L

## Ecoplug Max

Treatment for tree stumps to minimise root and stump sprouting. Ecoplug Max is an effective treatment for tree stumps to control unwanted re-growth.

**Activity:** Non-selective

**Active ingredient:** Glyphosate

**MAPP number:** 17581

**Coverage/dose:** Ask for details

**Pack sizes available:** 100 plugs

## Katoun® Gold

Contains pelargonic acid. A contact product for use on natural surfaces not intended to bear vegetation.

**Activity:** Total contact

**Active ingredient:** Pelargonic Acid

**MAPP number:** 20173

**Coverage:** 2,222m<sup>2</sup>

**Dose:** 22.5L/ha

**Pack sizes available:** 5L

## Roundup ProVantage 480

Patented potassium salt formulation containing 480g/L glyphosate and a unique blend of two surfactants. The optimised blend delivers highly efficient activity at the leaf surface and a synergistic improvement in glyphosate uptake and overall performance.

**Activity:** Non-selective translocated non-residual activity

**Active ingredient:** Glyphosate

**MAPP number:** 15534

**Coverage/dose:** 11,111 – 13,300m<sup>2</sup>/5L

**Pack sizes available:** 5L

## New Way Weed Spray

Natural, total herbicide for the control of a wide range of weeds, grasses and hard surface moss. The active ingredient acetic acid is fast acting with weeds and moss dying 1 – 2 days after treatment.

**Activity:** Non-selective

**Active ingredient:** Acetic Acid

**MAPP number:** 20148

**Coverage:** 200m<sup>2</sup>

**Dose:** 250L/ha

**Pack sizes available:** 5L

## Monsanto Amenity XL Glyphosate

A foliar applied herbicide for controlling annual and perennial grasses and broad-leaved weed. Ideal for clearing weed-covered ground prior to planting or sowing, to be used as a directed spray in ornamental planting and in forestry for site preparation and post-planting treatment.

**Activity:** Non-selective

**Active ingredient:** Glyphosate

**MAPP number:** 17997

**Coverage/dose:** 10,000m<sup>2</sup>/5L

**Pack sizes available:** 5L

**Important: Always read and follow label and safety instructions before buying or using these products.**

Use pesticides safely. The end-user is responsible to ensure that this product is used in-line with the Approved Code of Practice, and that all operators are trained and certificated in the use of any Ministry Approved professional product. Note terms and conditions regarding pesticide and chemical sales.

## Roundup ProActive 360

Foliar applied translocated herbicide developed using a new surfactant system containing a unique, patented blend of two surfactants.

**Activity:** Non-selective translocated non-residual activity

**Active ingredient:** Glyphosate

**MAPP number:** 17380

**Coverage/dose:** 10,000m<sup>2</sup>/5L

**Pack sizes available:** 5L

## Mascot Hi-Aktiv

A high-loaded, non-residual glyphosate herbicide formulated using the unique BEAT adjuvant system to enhance product activity. Controls a wide range of grasses, broad-leaved weeds and invasive species such as Japanese Knotweed in amenity, industrial and forestry situations.

**Activity:** Non-selective

**Active ingredient:** Glyphosate

**MAPP number:** 17696

**Coverage/dose:** 10,000m<sup>2</sup>/5L

**Pack sizes available:** 5L

# Residual Weed Control

## Chikara

A water dispensable granule formulation containing 25% w/w flazasulfuron for use as a non-selective, residual herbicide on natural surfaces not intended to bear vegetation.

**Activity:** Non-selective residual

**Active ingredient:** Flazasulfuron

**MAPP number:** 20185

**Coverage:** 3,333–10,000m<sup>2</sup>

**Dose:** 150g/ha

**Pack sizes available:** 50g, 150g

## Gem Granules

A potent granular herbicide designed to provide lasting weed control around trees, shrubs and ornamental plantings. Ideal for combating both grasses and broad-leaved weeds.

**Activity:** Selective

**Active ingredient:** Propyzamide

**MAPP number:** 19182

**Coverage/dose:** Treats 260 trees

**Pack sizes available:** 1kg, 5kg

## Kerb Gem Granules Applicator

A 'pepper pot' applicator – for swift and precise granule application featuring two easily selectable settings.

## Propyz

A versatile herbicide for both pre and post-emergence weed control. Tailored for forestry and amenity planting with primarily targeting grass weeds.

**Activity:** Non-selective

**Active ingredient:** Propyzamide

**MAPP number:** 19820

**Coverage:** 3 ha

**Dose:** 4.25L/ha

**Pack sizes available:** 10L

## Relva Granules

A long-term solution for controlling both annual and perennial grasses along with a diverse range of weeds. For use in the winter to prevent spring regrowth.

**Activity:** Selective

**Active ingredient:** Propyzamide

**MAPP number:** 16744

**Coverage/dose:** 1,300m<sup>2</sup>

**Pack sizes available:** 5kg

# Selective Weed Control

## Darby 24-D

A powerful, systematic action herbicide designed to control broad leaved weeds in cereals and grassland.

**Activity:** Selective

**Active ingredient:** 24D/Dimethylamine Salt

**MAPP number:** 19780

**Coverage/dose:** 2.8 – 3.3L/ha

**Pack sizes available:** 10L

## Headland Polo

A robust herbicide renowned for its effectiveness in controlling resilient paddock weeds.

**Activity:** Selective

**Active ingredient:** 24D/MCPA

**MAPP number:** 19599

**Coverage/dose:** 30,000m<sup>2</sup>

**Pack sizes available:** 10L

## Agritox

A solution for effective stubborn weed control in grassland and cereal crops.

**Activity:** Selective

**Active ingredient:** MCPA

**MAPP number:** 14894

**Coverage/dose:** 30,000m<sup>2</sup>

**Pack sizes available:** 10L

## Kerb Flo

A winter application grass weed killer, controls seedling grasses as well as established deep rooted perennial grasses.

**Activity:** Selective

**Active ingredient:** Propyzamide

**MAPP number:** 13716

**Coverage/dose:** 15,000m<sup>2</sup>

**Pack sizes available:** 5L

## Thrust

Tailor-made for tackling annual and broad-leaved weeds in agricultural and amenity grasslands.

**Activity:** Selective

**Active ingredient:** 24D/Dicamba

**MAPP number:** 15408

**Coverage/dose:** 16,000m<sup>2</sup>

**Pack sizes available:** 5L

## Praxys

A selective herbicide with three powerful active ingredients and low application rates.

**Activity:** Selective post emergence with systemic activity

**Active ingredient:** Florasulam/Fluroxypyr/Clopyralid

**MAPP number:** 19820

**Coverage:** 10,000-20,000m<sup>2</sup>/2L

**Dose:** 1 – 2L/ha

**Pack sizes available:** 2L

## Esteron T

An extremely effective herbicide to control weeds in sports and amenity turf as well as domestic lawns.

**Activity:** Selective

**Active ingredient:** 24D/Florasulam

**MAPP number:** 17432

**Coverage/dose:** 16,667m<sup>2</sup>

**Pack sizes available:** 2L

## Enforcer

A selective herbicide for broad leaved weeds in managed amenity turf.

**Activity:** Folia selective

**Active ingredient:** 2,4-D/MCPA/Mecoprop-P/Dicamba

**MAPP number:** 17274

**Coverage/dose:** 6,600m<sup>2</sup>/5L

**Pack sizes available:** 5L

## Synero

Controls a wide range of deep-rooted perennial and herbaceous weeds on amenity grassland areas.

**Activity:** Selective

**Active ingredient:** Aminopyralid/Fluroxypyr

**MAPP number:** 18579

**Coverage/dose:** 25,000m<sup>2</sup>

**Pack sizes available:** 3L

## Mixture B NF

Accelerates waxy leaf cuticle penetration by dissolving the coating – reduces the risk of wash off, aids spreading properties and increases herbicidal uptake.

**Activity:** Non-ionic

**Active ingredient:** Surfactants/Wetters/Spreaders/Penetrants

**Adjuvant number:** 0570

**Coverage/dose:** Varies for each project

**Pack sizes available:** 5L

## Diamond Horse Tail Killer

An extremely effective weed killer offering excellent results on many tough annual and perennial weeds including horsetail.

**Activity:** Selective

**Active ingredient:** 24D/Glyphosate

**MAPP number:** 19846

**Coverage/dose:** 10,000m<sup>2</sup>

**Pack sizes available:** 1L, 5L

## Laser

An emulsifiable concentrate designed for effective post-emergence control of both annual and perennial grass weeds.

**Activity:** Selective

**Active ingredient:** Cycloxydim

**MAPP number:** 12930

**Coverage/dose:** 0.5 – 2.5L/ha

**Pack sizes available:** 5L

## Icade

Controls deep rooted perennials, woody and invasive weeds. Triclopyr is combined with aminopyralid, to deliver a highly effective herbicide containing lower amounts of active ingredients, without losing its potency.

**Activity:** Selective, translocated activity

**Active ingredient:** Triclopyr/Aminopyralid

**MAPP number:** 19069

**Coverage:** 2,500m<sup>2</sup>

**Dose:** 4L/ha

**Pack sizes available:** 1L

## Blaster Pro

A herbicide which controls a range of deep-rooted perennial, herbaceous weeds and woody weeds on amenity grassland

**Activity:** Folia selective

**Active ingredient:** Triclopyr/Clopyralid

**MAPP number:** 15752

**Coverage/dose:** 8,300m<sup>2</sup>

**Pack sizes available:** 1L

## Barrier H

An effective ragwort weed killer which can be applied at all stages of growth. Can be sprayed onto flowerheads to stop the seeding process straight away.

**Activity:** Selective

**Active ingredient:** Citronella Oil,

**MAPP number:** 17145

**Coverage/dose:** Varies

**Pack sizes available:** 5L

**Important: Always read and follow label and safety instructions before buying or using these products.**

Use pesticides safely. The end-user is responsible to ensure that this product is used in-line with the Approved Code of Practice, and that all operators are trained and certificated in the use of any Ministry Approved professional product. Note terms and conditions regarding pesticide and chemical sales.

# Pesticides

## Acelepryn Insecticide

Controls chafer grubs and leatherjackets in managed amenity turf and approved for use on golf courses, airfields, racecourses, bowling greens and lawns. Only effective against young larvae. A 5m buffer zone is required to protect aquatic life.

**Coverage/dose:** 0.6L/ha

**Pack sizes available:** 600ml, 3L

## Decis Protech

Controls aphids, caterpillars, oak processionary moth and many other pests. A rapid and cost effective pyrethroid product for regular treatments on a range of biting, chewing and sucking insect pests in numerous agricultural and horticultural crops.

**Coverage/dose:** 12ml/10L water

**Pack sizes available:** 1L

## Trico Deer Repellent

Addresses the challenge of deer encroachment in forestry and garden settings. Deer can pose a threat to newly establishing crops – this repellent provides robust protection ensuring reliable defence damage all year-round.

**Coverage/dose:** 5,000 – 10,000m<sup>2</sup>

**Pack sizes available:** 10L

## Pyrethrum 5 EC

A natural insecticide, registered for use in organic and non-organic farming. An emulsifiable concentrate prepared from pyrethrum to control beetles, aphids, blackfly, greenfly, caterpillars and white fly on organic flowers, fruit and vegetables.

**Coverage/dose:** 1.1 – 2.4L/ha

**Pack sizes available:** 1L

## Dipel

A natural, biological insecticide to control caterpillars in vegetables, soft fruit, ornamentals, box hedging, trees, forestry and amenity vegetation. This product is a naturally occurring micro-organism which is also effective on brown tail moth and oak processionary moth.

**Coverage/dose:** 0.075 – 1kg/ha

**Pack sizes available:** 500g

## NutriFlo Casting

A revolutionary liquid solution crafted from plant nutrients, free from pesticides, aimed at enhancing turf vitality and transforming the local soil surface in areas afflicted by excessive worm casting. It irritates and discourages worms minimising the occurrence of unsightly casting.

**Coverage/dose:** 5,000 – 10,000m<sup>2</sup>

**Pack sizes available:** 10L

## Propellar Chalara Ash Dieback Disinfectant

A sprayable disinfectant to prevent the spread of devastating tree diseases. The fungal pathogens which are responsible for the spread of ash dieback and sudden oak death attack the trees through the leaves via ascospores.

**Coverage/dose:** Ready to use

**Pack sizes available:** 1L, 5L

## Forester

A contact insecticide for application post planting for the reduction of damage by large pine weevil in forestry and for the control of bark beetles on felled logs.

**Coverage/dose:** Varies

**Pack sizes available:** 5L

# Bio-pesticides

## Leather Jacket Control – Nemasys J

Organic pest control for the control of Leatherjackets (also known as daddy long-legs) in turf. Applied to moist compost/soil, when the soil temp is above 12°C. Safe for humans, the environment, crops and beneficial insects.

**Pack sizes available:** 50ml, 250ml

## Vine Weevil Control – NEMAControl

Contains the natural nematode, which is effective at controlling vine weevil grubs. It comes as a powder simply mix with water and apply like a liquid feed to the soil around the roots.

**Pack sizes available:** 50ml, 250ml, 500ml

## Chafer Grub Control

Biological chafer grub control is a highly effective, safe treatment that can be used on turf and plants, safe for humans, the environment, crops and beneficial insects.

**Pack sizes available:** 50ml, 250ml, 500ml

# Injectors

## JK1000 Stem Injector

Including stem injection tool, injection needle for giant hogweed, contractor pack, cavity needle and heavy-duty needle.

## InjectorDos Pro

Including injection tool, contractor pack, small needle and replacement needle set.

# Marker Dye and Adjuvants

## Blue Gem Dye Spray Indicator

A premium food-grade blue dye formulated to enhance the precision of herbicide and pesticide applications. When mixed into the spray tank, serves as a crucial tool for accurate spraying, visibly marking treated areas with its distinctive blue hue.

**Coverage:** 10,000m<sup>2</sup>

**Pack sizes available:** 1L

## Codacide Oil

An organic, natural oil adjuvant designed to optimise pesticide applications while minimising waste. Crafted from vegetable oil, this innovative solution serves as a versatile sticker, enhancing adhesion, spread and uptake on target surfaces.

**Coverage:** Various

**Pack sizes available:** 25L

## Speedway Total

A spray adjuvant that contains a blend of surfactants and spreaders. It is designed to enhance the effect of glyphosate and other total and/or non-selective herbicide treatments. This product assists herbicide penetration into the leaf cuticle by dissolving the waxy leaf coating.

**Coverage:** Various

**Pack sizes available:** 5L

# Hard Surface Cleaners and Disinfectant

## Algon Path and Patio Cleaner

A block paving cleaner for use on an extensive range of outdoor surfaces. Can simply be put into a garden sprayer or applied with a soft broom/paint brush – either method eradicates the need for scrubbing or rinsing.

**Coverage:** 480m<sup>2</sup>

**Pack sizes available:** 20L

## Sapphire

An outdoor cleaner with a special surfactant system which allows the active ingredients to penetrate quick and deep. It is an effective way to treat and prevent mould, algae and grime on all hard surfaces without the need to scrub or pressure wash.

**Coverage:** 100 – 200m<sup>2</sup>

**Pack sizes available:** 1L, 5L

## Virkon S

A powerful broad-spectrum, multi-purpose virucidal disinfectant with exceptional safety profile towards man and animals. This product is highly versatile, suitable for use on surfaces and equipment with water and aerial disinfection properties.

**Coverage:** Various

**Pack sizes available:** 5kg

## Enclean

A multi-surface biocide for cleaning hard surfaces while complying with OF&G Standards and approved for use in organic systems. Enclean removes algae and green deposits from hard surfaces and building materials.

**Coverage:** 555m<sup>2</sup>

**Pack sizes available:** 1L

## Sapphire Pro

A biocide derived from plants, offering curative properties for controlling algae on outdoor surfaces. Delivers rapid and enduring effects, suitable for all year-round application and is sanctioned for use in organic systems.

**Coverage:** Up to 555m<sup>2</sup>

**Pack sizes available:** 1L, 5L

# Sprayers

## Cooper Pegler Range

Durable, robust and accurate agrochemical applicators. The unique diaphragm pump system assures trouble-free protection. The tank releases the excess pressure and returns overflow liquid to the tank.

### Models:

Maxipro Sprayer 8L  
Maxipro Sprayer 1.5L  
Maxipro Sprayer 5L  
CP15 S2000 Knapsack Sprayer 15L

## Barks

### Scotbark Playbark

A durable yet soft bark for use in play areas. Also suitable to use as a mulch to control weeds and protect plant roots.

**Particle size:** 18 – 35mm

**Pack sizes available:** 70L, Loose Load

### Composted Fine Bark

A dark brown, organic matter-rich fine bark and soil conditioner to improve soil structure, quality, organic matter levels and water holding capacity.

**Particle size:** 0 – 12mm

**Pack sizes available:** 60L, Loose Load

### Melcourt Ornamental Bark

A deluxe grade ornamental bark which helps conserve soil moisture, suppresses weed growth and is suitable for a wide range of landscape applications.

**Particle size:** 0 – 65mm

**Pack sizes available:** 60L, Loose Load

### Medium Grade Ornamental Bark

A narrow range of ornamental bark which is long lasting, low maintenance and provides an attractive finish to gardens and landscape schemes.

**Particle size:** 12 – 35mm

**Pack sizes available:** 70L, Loose Load

### Woodland Grow Bark

A quality blended bark with season-long coverage and protection. Provides excellent coverage, improve moisture retention, enhances plant growth and adds natural aesthetic appeal.

**Particle size:** 13 – 50mm

**Pack sizes available:** 40L, Bulk Bags

# Composts and Soil Improvers

## Carbon Gold Tree Soil Improver

Ideal for transplanting new stock and treating established plants, this biochar treatment is suitable for all types of trees, shrubs and woody plants. It promotes quicker establishment, better root growth and improved soil biology.

**Pack sizes available:** 20kg

## Carbon Gold Tree Fertiliser

Potassium phosphate, biochar, mycorrhizal fungi, seaweed and wormcasts. Use with new or established trees/shrubs to increase nutrients. Soluble pellets expand microbial populations and reduce losses even in the harshest conditions.

**Pack sizes available:** 10kg

## Soil Improver

An addition to soil to improve the structure and fertility of the soil to effectively help plants grow better and healthier. This product helps increase water retention and drainage while promoting aeration and retaining vital nutrients.

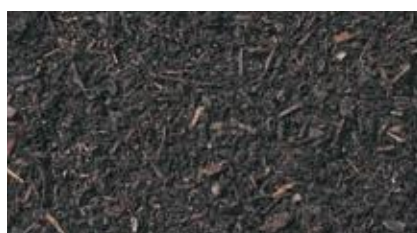

**Pack sizes available:** 50L

## Melcourt SylvaGrow Rose, Tree and Shrub Compost

A compost soil improver formulated for tree and shrub planting. 100% peat-free, it contains slow-release nutrients to aid the establishment of newly planted trees and shrubs.

**Pack sizes available:** 40L

## Melcourt All-Purpose Peat-Free Compost

A peat-free growing medium manufactured from quality conifer bark, wood fibre, coir and green compost. Suitable for garden projects such as potting, patio gardening, container growing and tree and shrub planting.

**Pack sizes available:** 40L

## Rootmaster Soil Improver Compost

An organic compost medium for improving soils. Adds organic matter which ultimately increases nutrient content and aids water retention. Contains chicken manure, straw, rotted farmyard manure which are composted and blended together.

**Pack sizes available:** 80L

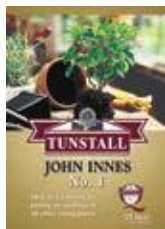

## Woodland Grow Growing Media

Designed to foster robust plant growth and ensure optimal soil health, this premium compost blend offers an all-natural solution for enriching your gardening and landscaping projects.

**Pack sizes available:** 50L

## John Innes Compost No.1

A loam-based compost formulated for healthy germination and seedling development. Ideal for seedlings, plug plants, rooted cuttings and sensitive species.

**Pack sizes available:** 25L

## John Innes Compost No.2

A unique formula that improves compost structure and prolongs nutrient retention. Ideal for seed sowing, cuttings, bedding, plug and pot plants, shrubs and perennials.

**Pack sizes available:** 25L

## John Innes Compost No.3

A universal compost which is ideal for potting on a wide range of plants. Ideal for use in pots, tubs, baskets and containers.

**Pack sizes available:** 25L

## Organic Rooster Manure Pellets 5-3-3 + 9% CA

Helps to improve soil structure. Essential for drought resistance to give the best conditions for healthy plants. Safe for use on all plants.

**Application rate:** 35 – 70g/m<sup>2</sup>

**Pack sizes available:** 25kg

## PAS100

A natural, slow release nutrient supply compost to assist with improving soil structure and better plant survival rate. It improves growth, soil water holding capacity and is suitable for a variety of projects.

**Pack sizes available:** 50L

## Horticultural Grit

A decorative top dressing for landscaping projects. Horticultural Grit has been washed and is free from lime which gives it a neutral pH that will not affect soil acidity levels.

**Pack sizes available:** 20kg, Bulk Bag

## Green-tree Soils

Green-tech manufactures its own range of Green-tree British Standard soils and growing media, offering a portfolio of products that meet the demands of today's commercial landscape projects.

### British Standard Topsoil

Certified to BS3882:2015, suitable for landscape and construction projects that require quality, consistent topsoil alongside meeting environmental and green credentials.

- High organic matter
- Light in texture
- Consistent supply
- NHBC compliant

### British Standard Subsoil

Conforms to BS8601:2013, Green-tree Subsoil is incorporated in projects across the UK to build up levels and construct specific landscaping contour requirements.

- High quality
- Clean and consistent materials used
- Builds levels and constructs contouring requirements

### Roof Garden Substrates

Incorporated in roof garden projects across the UK, our Green-tree roof garden substrates are manufactured to exhibit lightweight properties whilst still providing the organic content requirement for your particular project. Our extensive and intensive substrates provide good levels of fertility alongside aeration and water holding properties and the consistent supply quality throughout your project.

- Containerised planting
- Podium roof gardens
- Biodiverse green roofs
- Retro-fit green roof installations

### Bioretention Soil

The Green-tree manufactured bioretention soil provides an efficient permeability rate to avoid waterlogging on the surface area whilst retaining sufficient nutrient levels and organic matter to support the planting scheme.

- Rain gardens
- Grey water management schemes
- Flood management schemes

## Weed Suppressant

### gtGroundcover

A black, woven polypropylen offering great weed suppression and reduces the need for spraying weeds off.

**Sizes available:**

100gsm: 1m x 50m, 1m x 100m, 2m x 50m, 2m x 100m, 3.3m x 50m, 3.3m x 100m, 4m x 100m

### DuPont™ Plantex® Gold

A long lasting, chemical free, superior weed control solution for tough weeds such as couch grass, horsetail and bindweed.

**Sizes available:** 1m x 25m, 2m x 25m, 1m x 50m, 2m x 50m, 1m x 100m, 2m x 100m, 4m x 100m

### Terram Weedguard 700

Non-woven fabric designed to suppress weeds without using chemicals while allowing water, oxygen and nutrients to pass through.

**Sizes available:** 2.25m x 50m

## Erosion Control

### Protecting land one solution at a time

Providing sustainable, effective erosion control products that help protect our environment while ensuring the stability of your land.

- Prevent soil erosion
- Enhance plant growth
- Support sustainable land management practices

# Windbreaks and Anti Bird Netting

## Windbreak Standard Mesh

Designed to reduce windspeed by 50%, protecting crops from water loss, soil erosion and wind damage.

**Sizes available:**

Black (6 x 8mm mesh size):  
1m x 30m, 2m x 30m

## Windbreak Heavy Duty Mesh

A semi-rigid windbreak that reduces windspeed by 60%.

**Sizes available:**

Black (15 x 5mm mesh size):  
1m x 30m, 2m x 30m

Green (15 x 5mm mesh size):  
1m x 30m, 2m x 30m

## Rokolene Windbreak Shelter Mesh

A high density, rokolene windbreak and shade net designed to withstand all climatic conditions.

**Sizes available:**

Green: 2m x 5m, 0.9m x 50m,  
1.2m x 50m, 1.8m x 50m

## Mono Windbreak Mesh

An extremely durable windbreak, designed to reduce windspeed by 50%, with a 6 – 8 year lifespan. Eyelets on the top and bottom to secure in place.

**Sizes available:**

Green: 1m x 50m, 1.5m x 50m,  
2m x 50m, 3m x 50m

## Economy Anti Bird Netting

Single stitch strong tape-thread netting with a 5 year lifespan. Offers protection to crops, flowers, vegetable patches, allotments and gardens.

**Sizes available:**

Green (17mm mesh size): 2m x 6m, 4m x 6m,  
2m x 100m, 4m x 100m, 8m x 100m

## Premium Anti Bird Netting

A soft, warm, permeable and translucent fleece. Versatile all-year weather protection, spun from filaments of polypropylene.

**Sizes available:**

Black (20mm mesh size): 2m x 100m,  
4m x 100m, 8m x 100m

# Green Screens

Green Screens are a green alternative to fencing. The screens consist of a metal grid which is covered with ivy plants to give you an instant living fence/screen. They provide privacy, hide unsightly areas and add interest to an outside space. Biodiversity can be added to the screens with the addition of climbers such as clematis, to give more impact and colour.

## Benefits

- Instant privacy and greenery result
- Easy and fast to install
- Contributes to biodiversity and a healthy environment
- Improves air quality
- Helps reduce fine dust by 40 – 60%
- A contributor to greening urban areas
- Environmentally friendly and fully recyclable
- Galvanised steel grid with a 10 year guarantee

**Screen size:** 1.2m wide by 1.8m high

**Grid:** 25cm x 10cm – 5mm steel galvanised

**Plant type:** Hedera Woerner

**Alternative species available:** Euonymus fort ‘Dart’s Blanket’, Hedera Hibernica, Hedera Helix ‘Glacier’, Hedera Helix ‘Goldchild’, Hedera Helix ‘Green Ripple’, Hedera Helix ‘White Ripple’, Carpinus Betulus, Trachelospermum Jasminoides, Pyracantha ‘Dart’s Red’

**Weight:** 20/30kg (approximately)

Other sizes available. Please contact your Technical Sales Advisor for more information.

\* Only Hedera Woerner species is available all year round

## Ecology Green Screen

NEW

A sustainable, biodiversity-enhancing ready-made hedge composed of seven native plant species. These plants not only provide aesthetic value with diverse colours and textures, but they also contribute to ecosystem restoration by supporting local wildlife and promoting healthy ecosystems.

**Screen size:** 1.2m wide by 1.8m high

# Grass and Turf Reinforcement

## Grass Reinforcement Mesh Protecta

A thick, slip-resistant grid used to reinforce and protect grassed surfaces prone to wear, rutting and smearing which can cause the ground to become muddy, boggy and unusable for vehicle or pedestrian use. Developed with an oscillated mesh structure which is designed to increase traction and improves slip resistance by 97% compared to standard meshes.

### Benefits

- Improves slip resistance by 97%
- Protects and strengthens heavily trafficked surfaces
- Slip resistant

### Products available

Lite Protecta (10mm thick):

1m x 10m, 1m x 20m, 2m x 10m, 2m x 20m

Suitable for occasional car parking, sporting pathways and heavy pedestrian traffic.

Medium Protecta (13mm thick):

1m x 10m, 1m x 20m, 2m x 10m, 2m x 20m

Suitable for overflow car parks, cycle paths with occasional maintenance vehicle access and regular residential lawn parking

Heavy Protecta (14.5mm thick):

1m x 10m, 2m x 10m, 2m x 20m

Suitable for grass access roads, grass car parks with regular vehicle access, event parking and occasional industrial vehicle parking.

## Turf Reinforcement Mesh Protecta

A lightweight plastic mesh for grass reinforcement and protection on surfaces from wear, rutting and smearing which can result in a muddy surface incapable of being used. It stabilises the grass and enables it to intertwine with the plastic mesh filaments creating a strong stable reinforced grassed surface.

### Benefits

- Preserves grassed surfaces
- Heavy duty, slip resistant polyethylene mesh
- Withstands heavy pedestrian use and occasional heavy weight vehicles

### Products available

Mesh Protecta 550gsm (25 x 29mm mesh aperture):

Black 2m x 30m, Green 2m x 30m

Mesh Protecta 660gsm (22 x 27mm mesh aperture):

Black 2m x 30m, Green 2m x 30m

## Case Study:

# Green-tech helps transform the University of York campus landscape

The University of York has a 'Campus for the Future' masterplan which includes delivering a major student accommodation project. The £130m flagship scheme, which has transformed the Heslington East Campus has recently been completed.

The location was chosen to strengthen the link between Campus East and Campus West while maximising views of the lake and surrounding parkland. The student accommodation project will help to meet the needs of its expanding global student body as well as aid with the university's student recruitment strategy.

Palmer Landscapes was awarded the landscaping contract to create green areas for the students to enjoy and to bring their outdoor space to life. This was achieved by planting tens of thousands of shrubs and hundreds of trees, spreading 10,000m<sup>2</sup> of seeding and turfing all the green spaces.

Green-tech has a long-standing relationship with Palmer Landscapes and supplied all the machine round tree stakes, tree belting, and blocks, Mona irrigation systems, and bespoke grass seed mixes that were used throughout the project. Green-tech also supplied the underground anchor systems and gator watering bags to stabilise and irrigate the trees.

The tree planting materials used in this project guarantee longevity, reduce tree damage or movement from the wind until the roots have fully established. The irrigation

systems were essential to guarantee the success of urban planted trees and shrubs. The grass seed used offers quick establishment while being very hard-wearing, giving an excellent appearance.

Palmer Landscapes Contract Manager, Sam Isles comments, "Green-tech was one of our main suppliers for this project. We have a strong relationship with them. They stocked all the products we needed and provided materials on a quick turnaround timescale. All planting materials were delivered on time and gave that professional finish that we pride ourselves on. The seed specification we were working too was very detailed so being able to tap into their expertise was invaluable and helped us so much."

# Ground Reinforcement Pavers

## Bodpave® 40

A patented interlocking cellular porous plastic paving grid system. It features 4 pre-clipped pavers, which reduce installation time and improve the strength of the connections by 250%. Bodpave 40 is robust, sturdy and durable with a longer service life.

**Coverage:** 4 units/m<sup>2</sup>

**Sizes available:**

500 x 500 x 40mm + 20mm fixing spikes

## Bodpave® 85

A strong, interlocking, UV stabilised cellular porous plastic paving grid for grass reinforcement, ground stabilisation and gravel retention on regularly trafficked areas. Bodpave 85 can be filled with grass or gravel and support up to 400t/m<sup>2</sup>.

**Coverage:** 4 units/m<sup>2</sup>

**Sizes available:**

500 x 500 x 50mm + fixing spikes

## Bodpave® Parking Markers

A snap-fit parking marker that can be used to produce parking bay lines, L-shapes, T-shapes and squares, T-junctions and access road centre lines. The marker can be easily cut to produce letters, words and arrows.

**Colour:** HDPE White

**Sizes available:** 215mm x 70mm

## CellPave 40

A permeable paving grid which can be used in conjunction with both grass and gravel. Manufactured from UV stabilised 100% recycled HDPE which is extremely strong, chemically inert and non-toxic enabling a safe, sustainable and eco-friendly surface.

**Colour:** Black, Green

**Sizes available:**

500mm x 500mm x 40mm + 25mm spikes

## CellPave HD

A truck-grade, heavy duty cellular paving system ideal for the creation of areas trafficked by large and heavy weight vehicles. Made from 100% recycled, UK sourced post-industrial polymers and fillable with gravel or grass – can be used in SuDS schemes.

**Colour:** Black

**Sizes available:** 600mm x 400mm x 75mm

## CellPave AP Paver

A 'no-dig' anchored ground reinforcement paving tile for well-established, free-draining grassed areas. It suppresses resurgence of mud, provides effective drainage and becomes stronger as the grass roots intertwine with the tile structure.

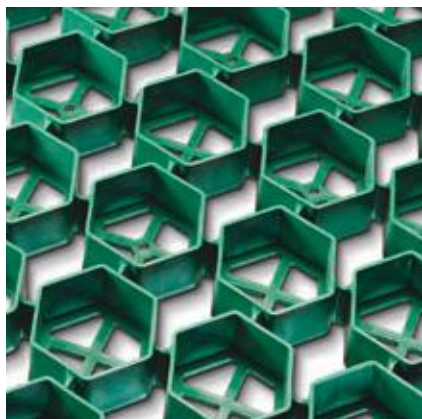

**Colour:** Black

**Sizes available:**

302mm x 302mm x 37mm (+/- 2%)

## GRB Plus Paver

A tried and tested solution for ground protection and stabilisation. It permits the free-flow of water, minimising drainage problems and features a locking system, making it easy and fast to install as no additional fixings or tools are required.

### Sizes available:

Green: 500 x 500 x 40mm

Black: 500 x 500 x 40mm

## TruckPave® 80

Manufactured from recycled plastics, this paver is robust, durable and capable of withstanding all levels of traffic up to and including coaches and HGVs. Economic, environmentally friendly and lightweight, these pavers can be filled with either grass seed/topsoil or gravel.

**Colour:** Grey

**Sizes available:** 600mm x 400mm x 80mm

## TruckGrid 80

Made from strong polyethylene and recycled plastic. This versatile, durable, stable and high-performance grid designed for truck loading/unloading areas. A safe solution for heavy-duty applications with operational efficiency.

**Colour:** Black

**Sizes available:** 1000m x 1000m x 80mm

# Rite-Edge Landscape Edging

## Rite-Edge Border Edging

Rite-Edge Lawn Edging is manufactured from strong, lightweight aluminium that will not rust, crack or rot like steel, wood or plastic. It is a neat, aesthetically pleasing, lawn, flowerbed and border edging which is quick and easy to install and is flexible enough to be shaped to form smooth classic lines.

### Benefits

- Ideal for plant beds, lawns, pathways, trails, driveways and maintenance strips
- Easily formed into different shapes such as circles
- Stakes lock into position for strong, permanent positioning

### Products available

Rite-Edge 4.8m Value Pack  
2 lengths, each 10.2cm x 2.4m,  
with 4 fixing stakes  
Natural, Brown

Rite-Edge 33.6m Pack  
14 lengths, each 10.2cm x 2.4m, with 28 fixing stakes  
Natural, Brown, Green, Black

Rite-Edge Joiners  
14 pieces, each 10.2cm x 10.2cm  
Natural, Brown, Black, Green

## Rite-L-Edge Flexible Edging

Rite-L-Edge features a strong L-shape design which is easy to install and lasts a lifetime. The product is suitable for all hard landscaping projects and can be used in conjunction with asphalt, paving slabs, block paving, resin bonded, concrete and loose gravel surfaces. Corner pieces are available in all sizes for added strength, aesthetic and appeal. This product needs to be secured with extra strong fixing pins.

### Benefits

- Manufactured from durable extruded aluminium alloy that will not rust
- Quick and easy to install, creating pleasing lines and curves with its extra strong L-shaped structure
- Strong, flexible and versatile

### Products available

30mm base width:  
18mm x 2.4m, 30 lengths/pack

50mm base width:  
25mm x 2.4m lengths, 30 lengths/pack  
38mm x 2.4m lengths, 20 lengths/pack  
50mm x 2.4m lengths, 20 lengths/pack  
64mm x 2.4m lengths, 20 lengths/pack

70mm base width:  
75mm x 2.4m lengths, 15 lengths/pack  
100mm x 2.4m, 1 lengths/pack  
120mm x 2.4m, 1 lengths/pack  
150mm x 2.4m, 1 lengths/pack

Strong steel fixing pins: 250/pack

## Rite Edge Cor-Ten Edging

A premium steel edging solution made from Cor-Ten steel. With exceptional durability, corrosion resistance and tensile strength - this product will develop a striking 'rusted' finish over time without its strength being compromised. Manufactured in the UK, this quality product is suitable for both soft and hard landscaping with low maintenance time; while enhancing the aesthetic of any outdoor space.

### Benefits

- Provides strong, rigid borders for landscapes, preventing soil erosion and keeping plants and materials in place
- A durable and long-lasting product which ultimately reduces the need for replacements
- Due to its corrosion-resistance, it doesn't need constant upkeep

### Products available

2.4m x 100m x 1.5mm, 9 lengths per pack

2.4m x 150m x 1.5mm, 6 lengths per pack

Natural with rusty finish

# Kinley Landscape Edging

## Borderline Steel Edge

A flexible and hard-wearing garden steel edging for heavy traffic areas such as driveways or busy paths. Suitable for use alongside bark, loose gravel, topsoil and seed – it is strong and an almost invisible border to section various areas in your outdoor space.

### Products available

100 x 2mm x 1m Length

Brown, Galvanised, Untreated

100 x 2mm x 2m Length

Brown, Galvanised, Untreated

100 x 3mm x 2m Length

Brown, Galvanised, Untreated, Anthracite Grey

150 x 3mm x 1m Length

Brown, Galvanised, Untreated

150 x 3mm x 2m Length

Brown, Galvanised, Untreated, Anthracite Grey

## Borderline Steel Edge Fixing Stake

Two sizes of fixing stakes in a range of finishes to secure Borderline steel edging in place.

### Products available

305mm Fixings, Packs of 15

Brown, Galvanised, Untreated, Anthracite Grey

405mm Fixings, Packs of 15

Brown, Galvanised, Untreated, Anthracite Grey

## Urban Steel Edge

A strong, steel edging for soft and hard landscaped areas with high traffic. This steel edging is 100% recyclable, made from sustainable materials and has seamless fixings and connections – its flexible design enables the creation of bespoke curves and lines in a range of landscaping projects.

### Applications

- High end residential
- Pathways
- Public realm
- Driveways
- Recreational areas
- Fine lawns

### Products available

Thickness: 3mm, 6mm

Height: 100mm, 150mm, 200mm, 250mm, 300mm

Finish: Corten, Galvanised, Powder Coated, Untreated

Length: 1m, 2.4m

For more information, please speak to a Technical Sales Advisor as this is a bespoke product.

## Bison Kerb Edge

An extra strong, light and simple to install steel kerb for delineating hard surfaces. This steel kerb edging is quick to install, robust, durable, corrosion resistant and can be used in conjunction with wet-pour or precast concrete, asphalt and resin-bound paving.

### Products available

Height: 75mm, 100mm, 150mm

Variation: Flexible, Rigid

Finish: Galvanised

Length: 2.4m

## Fort Edge

A strong, robust roll-topped steel edging for hard landscapes. This edging allows for bespoke shapes, snaking paths and strong L-shaped angles – its rolled edges mean there are no sharp edges exposed. It is highly resistant to atmospheric corrosion, requires little maintenance and is 100% recyclable.

### Products available

Height: 50mm, 75mm, 100mm, 150mm, 200mm

Variation: Flexible, Rigid

Finish: Corten, Galvanised, Untreated

Length: 2.4m

# Rain Bird Dripline

**XF Dripline Tie Down Stake**

**Blank Drip Tubing**  
**Length:** 100m

**Dripline PCD23-33**  
**Length:** 100m

**XF Dripline Barb Male 17mm Adapter**

**Sizes:** 17mm x 1/2"  
17mm x 3/4"

**XF Dripline Barb Male Tee Adapter**

**XF Dripline Barb Connector 17mm**

**XF Dripline Barb Elbow 17mm**

**XF Dripline Barb Tee 17mm**

**XF Dripline Quick Union Coupling Female Lock**

**Sizes:** 1/2", 3/4"

**XF Dripline Quick Union Coupling x 1/2" Male Lock**

**XF Dripline Manual Valve**

**XF Dripline Joiner**

**XF Dripline Clamp**

**XF Dripline Tubing End Closure**

**XF Dripline Lock Manual Valve x 3/4" Male**

**XF Dripline Plain Tee**

**XF Dripline End Plug 16mm**

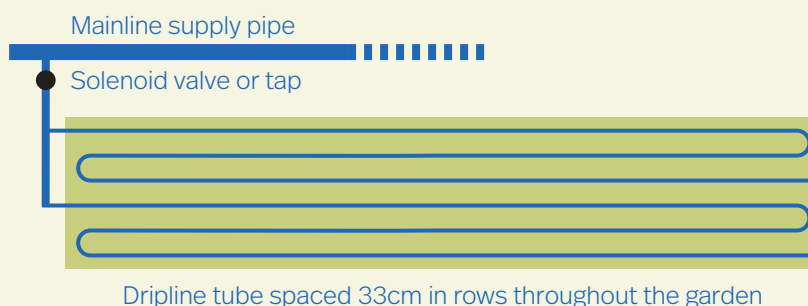

**XF Dripline 3/4" Male to 17mm Adaptor**

**XF Dripline Quick Elbow Connector**

## How to install a Dripline Irrigation System

Lay out evenly spaced rows of dripline across the surface of the garden. We recommend rows 33cm apart (3 rows per metre width of garden).

### Example

This garden is 10m long and 2m wide, with 6 rows of dripline 33cm apart. Total amount used (10m x 6) = 60 lineal metres

### Determine how much Dripline your project needs

1. Roughly determine the area in square metres. For triangular gardens, multiply length x width and then halve it.
2. Add up the cumulative area, the total will tell you the total area you need to irrigate. This is your **Total Garden Area**.
3. To calculate **Dripline Length**, multiply the Total Garden Area x 3. This is the total length in metres.
5. To calculate **Flow Rate**, multiply the **Dripline Length** x 7 to get the total required flow rate in litres/hour.

### Example

Garden A:	5 x 7 metres	35m <sup>2</sup>
Garden B:	3 x 6 metres	18m <sup>2</sup>
Garden C:	20 x 0.5 metres	10m <sup>2</sup>
<b>Total Garden Area</b>		<b>63m<sup>2</sup></b>

Therefore... the **Length of Dripline** required is approximately 63 x 3 = 189 metres (round up to 2 rolls of 100 metres)

The **Flow Rate** required is approximately 189 x 7 = 1,323 litres/hour

For over 30 years the Green-tech team has worked in partnership with foresters, landscape contractors and grounds managers to deliver projects that protect, enhance and improve the landscape environment. We are proud to be part of an industry, that enhances outdoor spaces whilst also benefiting the overall environmental, ecological and sustainability goals of the UK as a whole.

**Green-tech offers:**

- Nationwide delivery
- Next day availability
- More than 5,000 product lines
- Extensive stockholding
- Experienced and knowledgeable technical sales team

Green-tech works closely with trade associations across the UK and Ireland to generate awareness of the importance of the landscape environment in which we work.
